INAUGURATION OF NATIONAL WEBINAR

ABOUT THE COLLEGE

Eluru, the district headquarters of Eluru district. Eluru is known for its historical background and it is a hub of educational institutions. Two decades ago opportunities for women to pursue higher education, beyond SSC were far from reality. The management of the parent institution, Sir C R Reddy College which has been in existence for the last 75 years felt a dire need for a college exclusively for women congenial to the students. The inception of Sir C R Reddy College for Women made wide open the opportunities of girl students in and around Eluru.

The College was initiated with the vision and mission of imparting knowledge to women and providing an opportunity to them for pursuing higher education. Since then by the determined efforts and support of the management, encouragement and guidance of several philanthropists and complete involvement and hard work of the faculty the College has carved a niche for itself in the field of education.

Responding to the changing needs of the present day, the basic disciplines were multiplied into a range of subjects. The courses and programs are being re-organized, preparing and training the students to face the modern societal challenges so that they can compete with vigour and confidence when they step out of the College.

The College has been offering major groups in both Commerce and Science with important combinations. Courses offered in our college at intermediate level are MPC, BiPc, MEC and CEC, at UG level - 9 combinations are offered in B.Sc., and 2 combinations are offered in B.Com., including computer science.

At P.G. level M.Sc. organic Chemistry, is being offered. Above 2000 girl students are pursuing various courses here. The science labs and English language lab are fully equipped. There are about 250 computers with internet facility for the usage of students. The Hostel is located within the campus and so the students can make the best use of their labs & library. We have well qualified Teaching staff and hard working Non- Teaching and Technical Staff.

ABOUT THE WEBINAR

Research methodology is the specific procedures or techniques used to identify, select, process, and analyze information about a topic. In a research paper, the methodology section allows the reader to critically evaluate a study's overall validity and reliability. Now a days it is very essential for a researcher to know about the research methodology. Therefore this topic is chosen as a theme to bring awareness among the teaching staff, research scholars and post graduate students.

PREFACE

Research is a scientific investigation. Investigation means a search for new facts and ideas in any branch of knowledge. Thus, we can say that research is a search for knowledge. Research may be considered as a movement, a movement from the unknown to the known. It is actually a voyage of discovery. Research is carried out for two purposes; one is the discovery of new facts and the second, verification of the old ones. The object of every business organization, of course, is the discovery of new facts, new relationship, and new laws governing the business phenomena. But constant verification of the old concepts is also needed especially in dynamic business environment.

Common sense knowledge, based on the accumulated experiences, prejudices and beliefs of the people is often contradictory and inconsistent. On the other hand, scientific observations are based on verifiable evidence or systematic body of proof that can be cited. For example, some common sense statements are: man is more intelligent than woman; married men remain happier than single people; rural people are more hardworking than urban people etc.

We are also grateful to the Dr B.Srinivas, professor, Dept of Economics, Faculty of Social Science, New Delhi, Jamia Milia Islamia University, Mrs M.Kamala Kumari, Principal, AKNU Kakinada Campus, MNV Prasad, Dept of plant sciences, University of Hyderabad, Telangana, P.Giri Babu, Associate Professor, School of Business Management, Gitam University, Vizag, P.Sandhya cole, Dept of Physics, Acharya Nagarjuna University, Nagarjuna Sagar, Guntur.

Principal's Message

Distinguished Delegates, participants, and partakers!

Good afternoon and Greetings to one and all. It is a glorious moment to extend my warm wishes on behalf of Sir C.R.Reddy College For Women,Eluru. I want to convey my heartfelt gratitude to the Commissioner, Collegiate education, Andhra Pradesh for accepting to conduct this International Webinar. It also gives me an immense pleasure to welcome Prof KB Chandrasekhar, the vice-chancellor of Krishna University to deliver inaugural address on the occasion of the inauguration of this webinar on Research methodology. I am also thankful to foreign Speakers from Ireland and Saudi to enlighten all of us in the field of research.

It gives me immense warmth and great pleasure to grace all of your presence in the interest of the entire committee. It gives me tremendous contentment to be presenting the welcome speech amongst the most esteemed personalities in their respective fields.

There are two main approaches to research, namely quantitative approach and qualitative approach. The quantitative approach involves the collection of quantitative data, which are put to rigorous quantitative analysis in a formal and rigid manner. This approach further includes experimental, inferential, and simulation approaches to research. Meanwhile, the qualitative approach uses the method of subjective assessment of opinions, behaviour and attitudes. Research in such a situation is a function of the researcher's impressions and insights. The results generated by this type of research are either in non-quantitative form or in the form which cannot be put to rigorous quantitative analysis. Usually, this approach uses techniques like in depth interviews, focus group interviews, and projective techniques.

With this once again I express my sincere thanks to you all participants for your patience hearing. I am also thankful to the Organizing team of our college for giving me this chance to share my views. I wish you all success.

Thank you all.

INAUGURAL TALK:

Dr. P. Suresh Varma

I am very happy to know that Sir C R Reddy college for women, Eluru is organizing a National Webinar during 18th and 19th November, 2022 first of its kind in the history of the college.

It is the right time to choose the topic “Research Methodology”, which is useful for everyone. In research, whether it is Science, Humanities or Engineering data analytics involvement is very high when compared to earlier days. It plays a key role in distilling the information into a more accurate and relevant form, making it easier for researcher to do their job. Data tuning will also help to test the validity of data and to find the missing values.

I am sure that this webinar will definitely help to meet the expectations of in their research work and this programme would turn out to be a successful one and I wish they would conduct more programmes like this in future.

Research is a logical and systematic search for new and useful information on a particular topic. Research has to be active, diligent and systematic process of inquiry in order to discover, interpret or revise facts, events, behaviours and theories.

Research can be done in a systematic way by following the number of steps. The steps included are the study of concept, methods of experiments, noting down the observations in each and every step of experiment, analyzation of results, comparison of the results with previous experiments held by others, conclusion with proofs and graphs.

The important aspect of doing research is to give information to present people in a easy way with developed technology. Generally we have two types of research methods, we can explain the methods in two ways know as fundamental research and applied research.

The research on problem, involves different stages like selection of research problem, collecting data related to the problem to make literature survey, different methods of research to do experiments, different characterization techniques to analyse the samples like X-RD technique, FTIR, SEM & TEM for morphological studies, photoluminescence study, raman spectroscopy, electron paramagnetic resonance, optical absorption spectroscopy etc.

We can explain the characterization techniques and results with neat diagrams and graphs. Then compare the obtained results with previous results and analyse the characteristics.

Business research is a process of acquiring detailed information of all the areas of Business. Business research is a part of the business intelligence process. It is usually conducted to determine whether a company can succeed in a new region. Business success depends on availability of financial resources, having good human resources, good technology's and good physical infrastructures. Through research only we can take possible decisions.

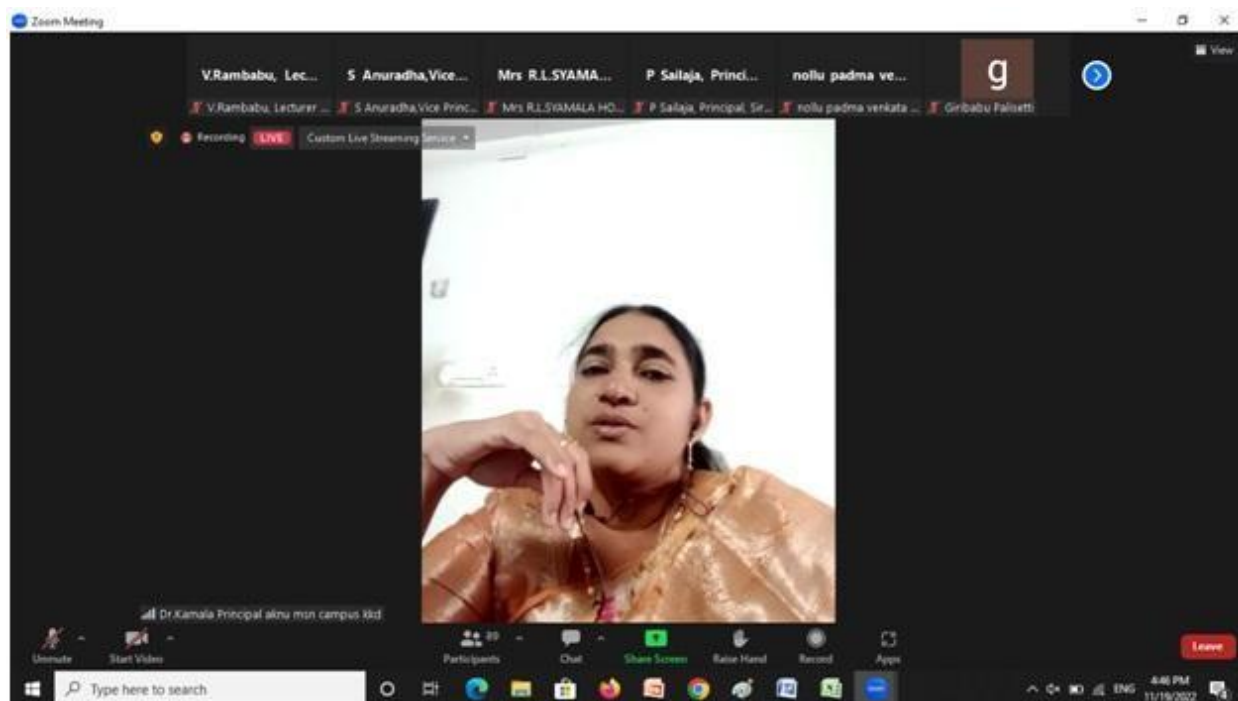

Decision making is the process of selecting the best alternative. Every decision making situation can be classified based on whether its best represents a problem or an opportunity. Research contribute to decision making in several ways like helping to determine current situation, determine and provide ideas for business practices and identify new strategic directions in uncertain. Situations analyse the decision making situation.

VALEDICTORY TALK

Dr M.KAMALA KUMARI

Would like to congratulate the management and the staff of Sir C R Reddy college for women, Eluru for arranging this two day' talk on

Research Methodology. The speakers have covered all the topics like Social Science, Biological Science, Physical science, Commerce and Management Studies.

There is no end and pause to the research. Our research should go in such a way to identify the problems we are facing globally and should give solutions to face them challengingly.

No field of work will give us satisfaction unless we have the proper research in our particular field. It improves our confidence levels, it gives satisfaction.

I congratulate the management and the principal for arranging this webinar and encouraging all towards research.
